

Natural way of restoring slow drains

Maintaining healthy drains and sinks takes time but so do bad ones. Poorly maintain sinks and floor drains where solids have build up can cause expensive back ups, offensive odours, fines or a loss of customer sales.

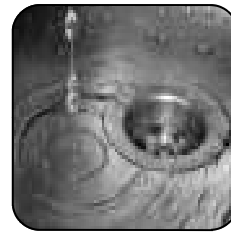

Sinks and drain lines in food preparation areas are notorious for slow drainage and back ups due to high concentrates of detergents and chemicals when washing up or cleaning. Not only are soaps and detergents washed away but fats, oils, grease, proteins, starch, cellulose and sludge are building up causing serious problems.

Consumers are looking for natural alternatives to harsh and hazardous chemical cleaners to unclog sinks and drain lines without damaging the environment or their health. The Liquid Drain and Trap Cleaner contains specifically selected beneficial patented bacteria which produce powerful enzymes to rapidly digest the waste matter in main sewage lines. Bacteria are living, single cell organisms that inhabit every environment - we even have bacteria inside of us! Of course there are different types of bacteria - some are good and some are bad but the amount of good bacteria outweigh the bad bacteria found.

Liquid Drain and Trap Cleaner is the natural, safe and effective way of rapidly breaking down fats, oils, grease, hair, sludge, soap, detergents and food scraps from drains, sinks, bathtubs, toilets and showers. The powerful enzymes convert the waste into nitrogen, oxygen, carbon dioxide and water without the need for harsh chemical cleaners.

Most sink and drain line additives or cleaners require you to add the product into main sewer lines daily or weekly. Not with the Liquid Drain and Trap Cleaner as each one litre bottle contains enough powerful action to restore the performance of most systems that are struggling with heavy loading for months. With a fresh odour neutralising fragrance and non-corrosive formulation, will not damage pipes, plumbing or other fixtures,

Liquid Drain and Trap Cleaner is the safest, easiest and effective way of maintaining the performance of your sink and drain lines.

Liquid Drain & Trap Cleaner

Environment

This product has been formulated from ingredients which are:

- ✓ Phosphate Free
- ✓ Non-Corrosive
- ✓ Non-Flammable
- ✓ pH Neutral
- ✓ Minimal VOC's (volatile organic compounds)
- ✓ No toxic, harmful or ecologically suspect ingredients: no ammonia, glycoethers, nonylphenol ethoxylates, caustics, chlorine, heavy metal agents, phthalates or masking agents.

All containers can be cleaned and reused or returned to Bio Natural Solutions to reduce plastic usage and waste. The containers can also be recycled.

Benefits

- ✓ Australian Owned & Made.
- ✓ Non-hazardous formula - safe to use.
- ✓ Prevents build up of soaps.
- ✓ Ideal for main sewage lines.
- ✓ Lowers COD in sewage effluents.
- ✓ Economical and safe for all plumbing types.
- ✓ Removes offensive odours.
- ✓ Septic Tank safe.
- ✓ Reduces your carbon footprint.

Usage Recommendations

Application

The Liquid Drain and Trap Cleaner has been formulated to rapidly digest the build up of FOG, sludge, soaps and detergents from toilets, traps, sinks, plumbing and septic tanks with out the need for harsh chemical cleaners

Initial Treatment - Pour 60mL down each drain for 3 consecutive days. For frequently used drains pour 120mL for the 3 days.

Maintenance - Pour 60mL down each drain monthly or as needed.

Garbage Disposal - Pour between 60-120mL down the disposal - turn on for 5seconds.

For Optimum Results

- This product is most effective when applied at the end of the day or at least when water use is at a minimum.
- As this product is biological, mixing with any bleach, disinfectants, acids, other chemicals or hot water (above 55°C) may reduce the effectiveness of the cleaner. Store in a dry, cool place.
- Best before within 2 years.
